Economical Proposal

The terms and conditions governing this proposal are subject to the master agreement between ALLIANZ COMPAÑÍA DE SEGUROS Y REASEGUROS, S.A. and SDG CONSULTING ESPAÑA, S.A. . Additionally, in 2025, we executed an addendum to the master agreement to include Allianz Technology, S.L.

GDP Pipelines Migration – IT Processes

Context & Objectives

Allianz is defining its new information architecture based on Azure. In this context, there is a need to **migrate several pipelines from the GDP** (Global Data Platform, to be deprecated) **to the new ADP** (Allianz Data Platform).

Project objectives

Migrate the following GDP processes into the ADP environment:

IT Use Cases Data

Security Control-m Logs

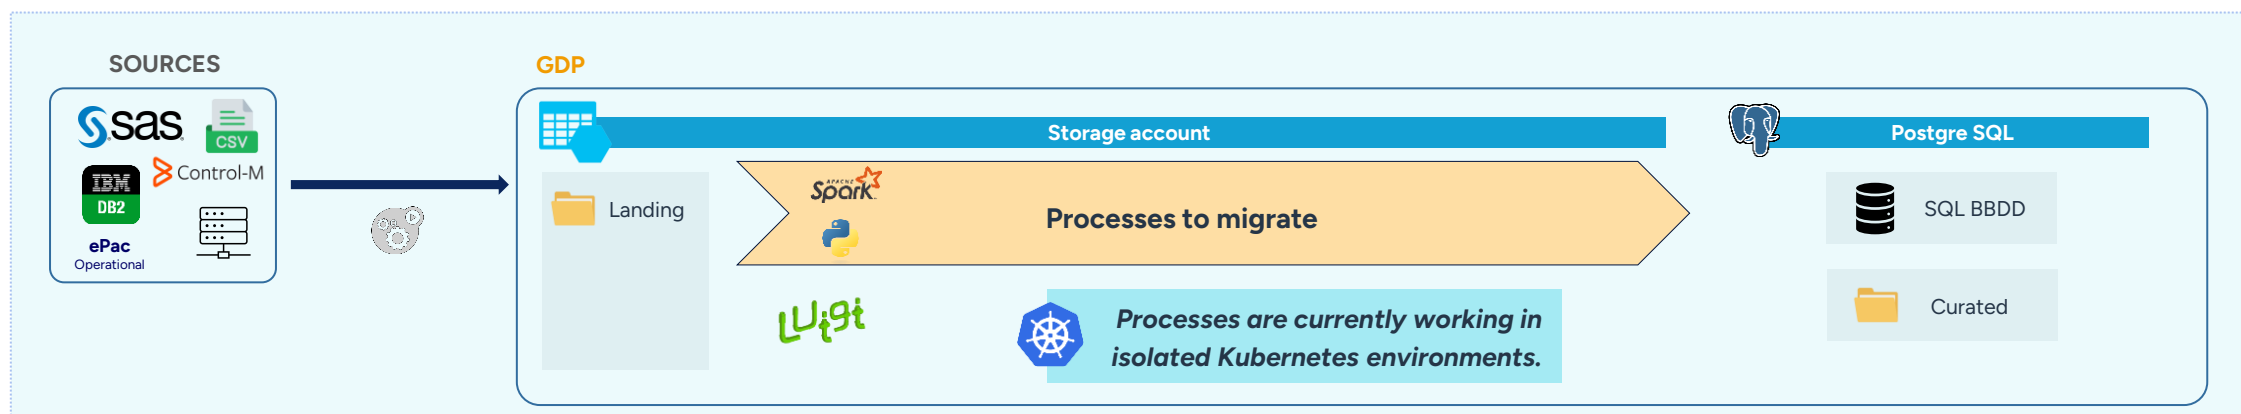

GDP Pipelines Migration – IT Processes

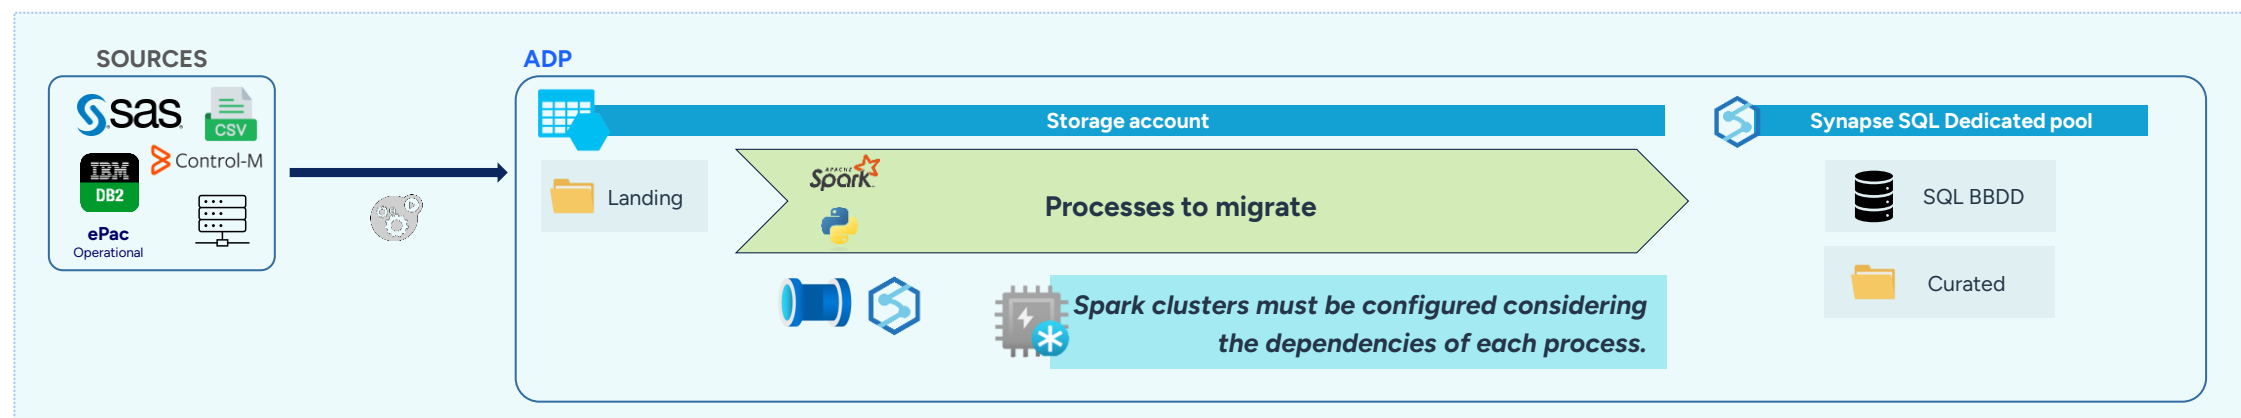

Proposed Solution - Architecture

The processes are currently implemented in the GDP and should be brought into the ADP environment, adapting the differences that exist between them, mainly environment, orchestration and destination .

As-Is

To-Be

GDP Pipelines Migration – IT Processes

Proposed Solution – Scope

The scope of the project and the breakdown of tasks to be carried out during the migration are shown below:

 Architecture Setup	 Use case migration (For each use case)	 Testing & UAT and Go Live
• Analyze ci/cd pipelines architecture. • Implement ci/cd pipelines for spark pools deployments. • Implement ci/cd pipelines for uploading config files to storage.	• Analyze python requirements. • Create customized spark pool with project requirements. • Analyze dependencies with metadata tables. • Migrate the necessary metadata tables into the ADP. • Analyze Luigi orchestration. • Design orchestration with Synapse Pipelines. • Implement Synapse pipelines and orchestration notebooks. • Analyze writes for Postgres. • Modify and implement new write methods for Synapse.	• Data History Dump. • UAT and validations (coliving at the end and switch).

GDP Pipelines Migration – IT Processes

Orchestration & Deployment

Process orchestration will be implemented, and **CI/CD pipelines** will be generated for the automation of deployments.

Orchestration in Azure Synapse Pipelines

- Configure the necessary dataflows in Synapse Pipelines.
- Implement flow control, error handling, and retry logic in workflows.
- Manage dependencies between tasks and workflows to ensure consistent, and sequential execution of data processes.
- Document orchestration workflows, including their design, configuration, and operation.

Azure Synapse Pipelines

Deployment

- Deploy of the DevOps framework for deployment.
- Synchronize and upload dbt project between the GitHub repositories.
- Deploy to the Preproduction environment and run integration and load tests.
- Deploy to Production environments.

GDP Pipelines Migration – IT Processes

Planification

A tentative planning of the project

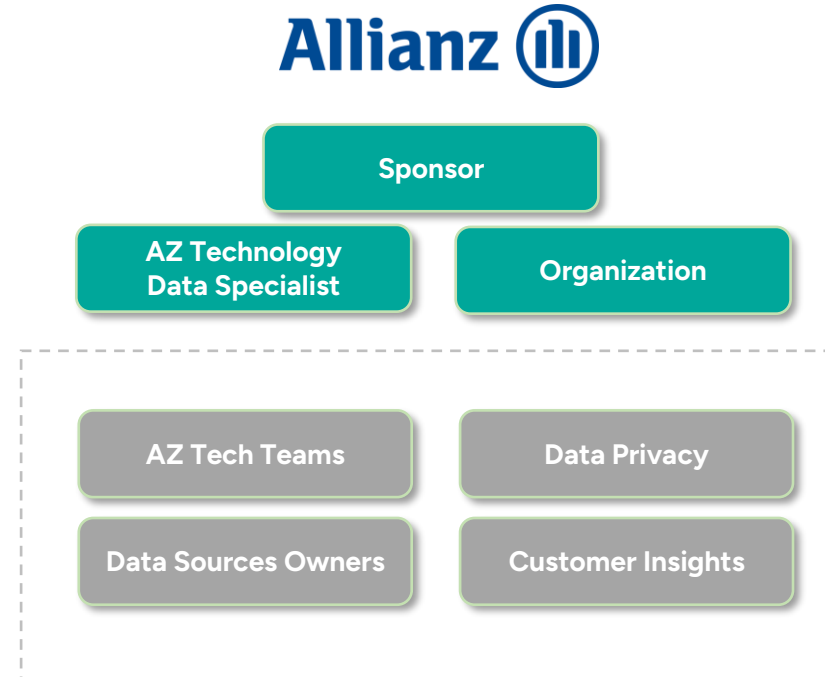

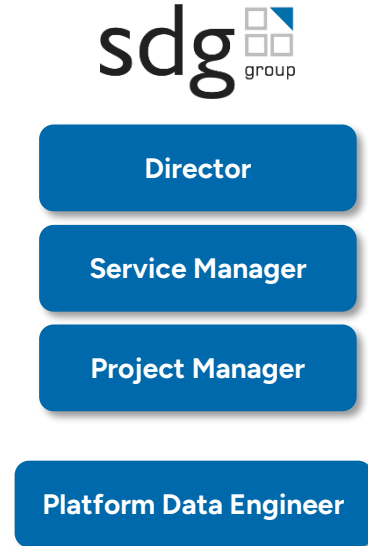

The architecture setup phase has synergies with the other projects and therefore the effort is lower

GDP Pipelines Migration – IT Processes

Team & Organization

The following working team is proposed:

GDP Pipelines Migration – IT Processes

Economical Proposal

Below is the economic proposal to cover the service of the proposal:

Costs related to scope

	Amount
Platform Data Engineer	14.760 €
Project Management	2.870 €
Total	17.630 €

SDG Group has made a strategic investment, applying the agreed-upon rates per role with Allianz Technology due to the volume and importance of the collaboration and initiatives.

CONSIDERATIONS

- The amount of the present offer is fixed in accordance with the project approach offered by SDG as contemplated in the objectives and scope of the offer.
- However, any change to the provisions of the Proposal must be previously agreed upon by both Parties.
- Invoicing will be done as follows: 30% at the time of acceptance of the proposal, 40% at the middle of the service and 30% at the end of the service
- Payment method: 60 days
- The terms and conditions governing this proposal are subject to the master agreement between ALLIANZ COMPAÑÍA DE SEGUROS Y REASEGUROS, S.A. and SDG CONSULTING ESPAÑA, S.A. . Additionally, in 2025, we executed an addendum to the master agreement to include Allianz Technology, S.L.

EXPENSES NOT INCLUDED

- All prices and amounts shown do not include V.A.T. or other legally applicable taxes
